80/80 = 100

Q.P. Code: 56421

Fourth Semester BBA Degree Examination
May/June 2026
(SEP Scheme)
STATISTICS FOR BUSINESS DECISIONS

Time : 3 Hours Max. Marks : 80

PART - A

Answer any TEN questions. TWO marks each. (10x2=20)

1. a) What is Classification?
   b) What is meant by Tabulation?
   c) What is Diagram?
   d) Mention the Types of Correlation.
   e) Give the Formula of Probable Error.
   f) Define Arithmetic Mean.
   g) What is Measures of Dispersion?
   h) What is Regression Analysis?
   i) What is Two Dimensional Diagram?
   j) Mention any two merits of Median.
   k) What is Correlation?
   l) What is Mode?

PART - B

Answer any SIX questions. FIVE marks each. (6x5=30)

2. Draw a blank table to show the number of students in a college according to:
   (A) Gender - Boys and Girls, (B) Facility - Arts, Commerce And Management,
   (C) Class - PUC and Degree.

3. Determine the median from the following data.

Wage in Rs.	20	21	22	23	24	25	26	27	28
No. of Workers	8	10	11	01	20	25	10	9	6

4. Calculate Standard Deviation from the following data.

Wages in Rs.	50	60	70	80	90	100	110	120
No. of Workers	8	5	9	4	6	7	3	2

5. Given the following data find two regression equations.

Particulars	X	Y
Arithmetic Mean	53.2	27.9
Standard Deviation	3.5	2.5
Correlation of Coefficient b/w x and y	0.75	0.75

6. Mention the Parts of the table and explain briefly.

7. Explain the merits and demerits of mean.

8. Calculate the required degree and express the data as Pie Chart.

Family	A	B	C	D	E	F	G	H
Expenses (in Rs.)	502	1689	543	470	286	94	75	51

PART - C

Answer any THREE questions. TEN marks each. **(3x10=30)**

9. Explain methods of classification of data.

10. Present the following data by percentage sub-divided bar diagram (Graphically Represent)

Items	Expenditure	
	Family - A	Family - B
Food	1500	2100
Clothing	750	1200
House Rent	600	900
Education	700	720
Fuel	800	600
Others	650	480
Total	5000	6000

11. Calculate Mean, Median and Mode from the following data.

Variable	10-13	13-16	16-19	19-22	22-25	25-28	28-31	31-34	34-37	37-40
Frequency	8	15	27	51	75	54	36	18	9	7

12. Calculate Karl Pearson's Co-efficient of Correlation for the following data and also calculate Probable Error.

Investment made in Rs.	105	111	104	112	118	98	116	103	116	112
Returns Obtained Rs.	62	64	53	60	72	56	68	60	69	65

* * *

Q.P. Code: 54322

Third Semester B.Com. Degree Examination,
December 2025 / January 2026
(SEP) 2024-25
COMMERCE
BUSINESS STATISTICS

Time : 3 Hrs Max. Marks : 80

SECTION - A

Answer any TEN sub questions. Each carries TWO marks. **(10x2=20)**

1. a) Define Statistics.
   b) Mention the types of Collection of Data.
   c) What is Tabulation?
   d) Mention the 2 properties of Arithmetic Mean.
   e) Find the Range : 20, 25, 80, 44, 96, 100 & it's coefficient.
   f) Define Standard deviation.
   g) Define Correlation.
   h) What is Regression?
   i) What is Classification?
   j) Give the meaning of Histogram.
   k) State any two differences between correlation and regression.
   l) Write the formula of Probable error.

SECTION - B

Answer any SIX questions. Each carries 5 marks. **(6x5=30)**

2. Briefly explain the types of classification.
3. Briefly explain the different methods of Collecting Primary Data.
4. From the following data calculate quartic deviation and it's coefficient.

X	:	20	60	80	100	120	140	160	200
f	:	25	48	60	57	29	10	8	2

5. Find the Geometric Mean.

   X : 20, 350, 450, 600, 861, 958

6. Draft a blank table to show the distribution of an employees in an office according to sex salary grade (below 3000, 3000 to 5000 & 5000 above) designation (Supervisors, Assistant, Clerk)

7. Obtain two regression equation from the following data & predict the value of X when Y = 7.

   N = 20, $\bar{X}$ = 4, $\bar{Y}$ = 2, ΣX^2 = 1680, ΣY^2 = 320, $\Sigma dxdy$ = 480

8. From the following data prepare sub-divided bar diagram.

Items	Family A	Family B
Food	1,400	1,600
H.R.	1,200	1,600
Cloth	700	800
Miscellaneous	1,000	1,000
Savings	700	2,400
Total	**5,000**	**8,000**

9. Construct the frequency distribution table from the following data with class intervals 0-10, 10-20 & so on.

18	35	46	22	07	11	03	12	20	32
17	21	13	29	24	39	23	36	27	43
25	49	10	04	14	26	08	16	28	41

SECTION - C

Answer any THREE questions. Each carries 10 marks. **(3x10=30)**

10. Calculate Mean, Median and Mode from the following data.

C-I :	10-19	20-29	30-39	40-49	50-59	60-69	70-79	80-89
f :	10	18	8	6	4	2	5	7

11. Calculate Std. Deviation and Co-efficient of Variation from the following data.

C-I :	10-20	20-30	30-40	40-50	50-60	60-70
f :	10	18	20	6	4	2

12. Calculate the Karl Pearson's Co-efficient of correlation and it's probable error.

X :	8	10	15	17	20	22	24	25
Y :	25	30	32	35	37	40	42	45

13. From the following data obtain two regression equations.

X :	25	28	35	32	31	36	29	38	34	32
Y :	43	46	49	41	36	32	31	30	33	29

14. Explain different methods of collecting primary data with its merits and demerits.
